The reason I do not know or care is that most people I meet who play the London do not know these attacking lines either. This is because they are choosing the London system to avoid learning about opening theory. The fact that they do not the attacking lines is why most of the games I play against the London system are normally boring.

Precursors to chess originated in India during the Gupta Empire. There, its early form in the 6th century was known as chaturaśāṣṭakā, which translates as "four divisions (of the military)": infantry, cavalry, elephantry, and chariotry. These forms are represented by the pieces that would evolve into the modern pawn, knight, bishop, and rook, respectively.
