cloud classification from satellite pdf

Cloud identification and classification: Order of listed types. In section two of this page (Classification of major types), height ranges are sorted in approximate descending order of altitude expressed in general terms.

List of cloud types - Wikipedia

In meteorology, a cloud is an aerosol consisting of a visible mass of minute liquid droplets, frozen crystals, or other particles suspended in the atmosphere of a planetary body. Water or various other chemicals may compose the droplets and crystals. On Earth, clouds are formed as a result of saturation of the air when it is cooled to its dew point, or when it gains sufficient moisture ...
