Proceedings Of The Conference On Complex Analysis

Description : This volume presents the proceedings of the Seventh International Colloquium on Finite or Infinite Dimensional Complex Analysis held in Fukuoka, Japan. The contributions offer multiple perspectives and numerous research examples on complex variables, Clifford algebra variables, hyperfunctions and numerical analysis.

with complex numbers as well as the geometric representation of complex numbers in the euclidean plane. We will therefore without further explanation view a complex number $x+iy \in \mathbb{C}$ as representing a point or a vector (x,y) in \mathbb{R}^2 , and according to our need we shall speak about a complex number or a point in the complex plane.

include graphical aspects into the complex analysis courses. These days queries of standard search engines yield an abundance of articles, applets and various course materials on the World Wide Web that implement graphical approaches to Complex Analysis. An excellent starting point is the page "Websites related to Visual Complex Analysis" [18].

The idea of this book is to give an extensive description of the classical complex analysis, here "classical" means roughly that sheaf theoretical and cohomological methods are omitted. The first four chapters cover the essential core of complex analysis presenting their fundamental results.
