Injection Molding | Computer Aided Technology Injection Molding is a manufacturing process for producing parts by injecting material into a mold and can be performed with a host of materials, including metals, glasses, elastomers, confections, and most commonly thermoplastic and thermosetting polymers.

Mold design is a knowledge-intensive process. This paper describes a knowledge-based oriented, parametric, modular and feature-based integrated computer-aided design/computer-aided engineering (CAD/CAE) system for mold design. Development of CAx systems for numerical simulation of plastic injection

The Value Of Reliable Design. Many of the products we design get produced in large, multi-cavity tools. To prove that our design is ready for manufacturing, we are often asked to produce an injection molded tool as well as injection molded parts.
