Observables, operators, and complex numbers in the Dirac theory David Hestenes Abstract The geometric formulation of the Dirac theory with space-time algebra is shown to be equivalent to the usual matrix formalism. Imaginary numbers in the Dirac theory are shown to be related to the spin tensor. The relation of observables to operators and the ...

Abstract: One approach to multivariate operator theory involves concepts and techniques from algebraic and complex geometry and is formulated in terms of Hilbert modules. In these notes we provide an introduction to this approach including many proofs.
