partial differential equations an pdf

Here is a set of notes used by Paul Dawkins to teach his Differential Equations course at Lamar University. Included are most of the standard topics in 1st and 2nd order differential equations, Laplace transforms, systems of differential equations, series solutions as well as a brief introduction to boundary value problems, Fourier series and partial differential equations.

Section 4-3 : Inverse Laplace Transforms. Finding the Laplace transform of a function is not terribly difficult if we've got a table of transforms in front of us to use as we saw in the last section. What we would like to do now is go the other way.
