Noise – Noise is the distortion that happens in digital photos when the ISO is pushed high and it can be a challenge when shooting in low light situations. Similar to grain in film photography, noise appears in an image as variations in brightness and color in the photo—and it doesn't look good.

## **The 9 Best Cameras for Low Light Photography**

The merits of digital versus film photography were considered by photographers and filmmakers in the early 21st century after consumer digital cameras became widely available. Digital photography and digital cinematography have both advantages and disadvantages relative to still film and motion picture film photography. In the 21st century photography came to be predominantly digital, but ...
