IIS often gets a bad wrap for being difficult to install and configure. However, using some of the built-in tooling for administration using PowerShell it's actually quite easy to configure IIS and even set up a new site and application pool with a few short scripts that are much quicker, and more repeatable than using the various Windows UI features.

Original answer. Root Cause. For Focused Inbox to work with Outlook 2016 you have to enable Modern Authentication in Exchange Online. As a nice side effect of enabling this feature Outlook 2016 will be able to connect to Office 365 Exchange Online when you have multi-factor authentication enabled without using an application password.
