Buddhism includes an analysis of human psychology, emotion, cognition, behavior and motivation along with therapeutic practices. A unique feature of Buddhist psychology is that it is embedded within the greater Buddhist ethical and philosophical system, and its psychological terminology is colored by ethical overtones. Buddhist psychology has two therapeutic goals: the healthy and virtuous ...

Bicameralism (the condition of being divided into "two-chambers") is a radical hypothesis in psychology that argues that the human mind once operated in a state in which cognitive functions were divided between one part of the brain which appears to be "speaking", and a second part which listens and obeys – a bicameral mind. The term was coined by Julian Jaynes, who presented the idea in his ...
