Volume 11, No. 3, Art. 8 " September 2010 . Sample Size and Saturation in PhD Studies Using Qualitative Interviews. Mark Mason. Abstract: A number of issues can affect sample size in qualitative research; however, the guiding principle should be the concept of saturation. This has been explored in detail by a number of authors but is still hotly debated, and some say little understood.

Ethnography (from Greek  $\acute{\alpha}\nu\theta\rho\omega\varsigma$ ,  $\acute{\epsilon}\theta\nu\sigma$ , ethnos "folk, people, nation" and  $\gamma\rho\alpha\phi\acute{o}$  grapho "I write") is the systematic study of people and cultures. It is designed to explore cultural phenomena where the researcher observes society from the point of view of the subject of the study. An ethnography is a means to represent graphically and in writing the culture of a group.

The qualitative approach to research design leads to studies that are quite different from those designed using the more traditional approach. The traditional approach, often referred to as quantitative research, leads to hypothesis-testing research, whereas the qualitative approach leads to hypothesis-generating research. This chapter will describe the difference

### **Introducing Qualitative Hypothesis-Generating Research**

Research can be classified in many different ways on the basis of the methodology of research, the knowledge it creates, the user group, the research problem it investigates etc. This research is conducted largely for the enhancement of knowledge, and is research which does not have immediate ...

How many interviews are needed in a qualitative research? Is there any rule or popular practice?

### **How many interviews are needed in a qualitative research**

Here in this topic of consumer research they are trying to identify reasons for purchasing a product, usually customers hesitate to reveal their reasons or motivational factor which made them to purchase a product or service at that time the consumer researchers use the two different types of research methodology to study consumer behavior: quantitative research and qualitative research.

### **Role of Research in understanding consumer behaviour**

The reflective and interrogative processes required for developing effective qualitative research questions can give shape and direction to a study in ways that are often underestimated. Good research questions do not necessarily produce good research, but poorly conceived or constructed questions will likely create problems that affect all subsequent stages of a study.

The Argument for and Against the Case Study Research Design. Some argue that because a case study is such a narrow field that its results cannot be extrapolated to fit an entire question and that they show only one narrow example. On the other hand, it is argued that a case study provides more realistic responses than a purely statistical survey.
