Soil life table. This table is a summary of soil life, coherent with prevalent taxonomy as used in the linked Wikipedia articles.

### **Soil life - Wikipedia**

In geotechnical engineering, soil compaction is the process in which a stress applied to a soil causes densification as air is displaced from the pores between the soil grains. When stress is applied that causes densification due to water (or other liquid) being displaced from between the soil grains, then consolidation, not compaction, has occurred.

### **Soil compaction - Wikipedia**

Aims and Scope: Coupled Systems Mechanics (CSM), an International Journal, aims at opening a new access to the valuable source of information and providing an excellent publication channel for the global community of Coupled Systems Mechanics. The areas covered by CSM journal include the current advances in Interactions (or Coupled Mechanics) of
