This text is an early draft for a general introductory textbook in computer science—a Java-based version of my 1995 textbook *The Art and Science of C*. My hope is that I can use much of the existing material in writing the new book, although quite a bit of the material and overall organization have to change.

Is teaching an Art or a Science? Teaching is based primarily on feelings and artistry not scientific rules. Teaching is an art and a craft. The scientific movement in psychology, especially behaviorism, and the scientific movement in education, especially school management reduces teaching to trivial

Alfred H. Burne wrote, "War is an art rather than a science; it is waged between human beings, and involves the interplay of their respective characters. Science does not recognize sentient beings as such."6 Thus, the friction of war and the animate nature of the participants made war more an art than a science.
